-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-20, 23, 24, 27 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evans –231 in view of Nagata et al.

Evans –231 discloses the basic claimed method of making an optical quality polarized part by injecting lens material into a sidefill gasket which holds a polarizer, the primary reference essentially failing to disclose that the lens material is high impact polyurethane. Note that polyurethane is by and of itself a high-impact material, and hence the instant recitation of “high impact polyurethane” is being considered to be readable on polyurethane in general. Nagata et al teaches forming lenses from polyurethane material using liquid prepolymers/reactants and one of ordinary skill in this art would have found the utilization of liquid polyurethane as taught therein as obvious in the method of the primary reference to make a impact resistant lens.

2. Claims 21, 22, 25, 26, 29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evans et al –231 in view of Nagata et al and Evans et al –703.

Evans et al –231 and Nagata et al disclose the basic claimed method lacking essentially the aspect of treating the polarizer for integral bonding to the optical construct and treating the polarizer for bonding a hard coating thereon. Evans et al –703 teaches these aspects and one of ordinary skill in the art would have found their incorporation

into the method of the primary reference as obvious to facilitate forming the desired, finished lens with a hard coat.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni, can be reached on 571 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
